Udacity,  
2465 Latham St,  
Mountain View, CA 94040.

**Dear IT Team,**

I am excited to apply for the Web Developer Position in your team. I graduated with a Second class honors Bachelor's Degree of Science in Computer Technology. I am also pursuing a Cloud DevOps Nanodegree at Udacity set to graduate in September. I would love to work for your Company and contribute to the mission of more profits and market growth.

I am a skillful graduate with a lot to offer and also learn in your organization. I have been in 2 attachments in the Kenya Wildlife office IT and Telecommunications Station in Nyeri (Mountain Conservation Area) each lasting 3 months and also an Intern in MFT Fulfillment Center in Nairobi. I got promoted to Assistant IT Manager at MFT Fulfillment Centre and in my 1-year experience I have designed Various Web Apps that have aided in day to day activities in the company.

To gain more development and coding skills I took the Cloud DevOps Nanodegree program which taught me Continuous Integration and Development, Developing Infrastructure as Code and designing the Cloud Architecture.

I hope to bring my fresh perspective as a developer with the DevOps background and my adaptability and diligence as a career change.

Best Regards,
